

# Exploring file metadata

## THE SITUATION

You have joined a planning project in its final stage. Your predecessors, **Susan Sauer** who left the project by the end of 2011 and **Ted deBaer** who replaced her at the time, have left a directory with unsorted pictures and PDF documents documenting **four different events** during the planning process.

The photographs were taken using a different camera every time, but always the same one throughout the event.

## YOUR TASK

**Relate each of the files to one of the events** by moving them to different folders you will have to create. You can evaluate both contents and metadata of the files.

Some of the images may have been post-processed so their date of last modification will not tell when the photograph was taken.

However, the fact that all images are of very small dimensions (less than a digital camera would supply) should not be taken as a hint to post-processing.

# Solution

First meeting, 14 <sup>th</sup> December 2011	First excursion, 4 <sup>th</sup> April 2012	Second excursion, 16 <sup>th</sup> April 2012	Final meeting, 8 <sup>th</sup> June 2012
